Presentation

Learning objectives

Semester in a partner laboratory with a minimum of 9 weeks abroad.

The "work-study skills" module is designed to train students for a specific mission in a laboratory. The objective is to become familiar with a particular environment, to acquire the codes, the understanding of how the structure works, and to come up with innovative solutions that will allow the project to progress.

For semester 8, the objective is to integrate the skills and knowledge acquired during the first three semesters. Semester 8 can be an opportunity for the student to be confronted with new structures, new ways of working, new work organizations through international mobility.

Description of the programme

Important points are:

- Training (basic knowledge, acquisition skills, analytical skills, synthesis skills, creativity and innovation level)

- Work and results (level of quality, quantity, efficiency, achievement of objectives, meeting deadlines, ownership of the subject, mastery of the subject)

- Personality (initiative, sociability, contacts, interests, motivation, sense of responsibility, method and organization, communication, open-mindedness, judgment and realism)

Generic central skills and knowledge targeted in the discipline
