2A internship in a company (other than their own)

ECTS credits
5 credits

Presentation

Learning objectives

The 2A internship is an assistant engineer internship allowing the discovery of the engineering profession. You will have to carry out a mission
representative of an engineer or researcher's job by taking an active position within a team. You will be required to
be a force for analysis and proposals.

In the particular case of the Entrepreneurship work-study program, this internship must be carried out in a different structure from that of the entrepreneurial project.

Description of the programme

The 2A internship can take place either in a company or in a laboratory, in France or abroad. It lasts between 2 and 3 months (8 weeks minimum) and takes place from June to August.
