Presentation

Learning objectives

The 2A internship is an assistant engineer internship that allows you to discover the engineering profession. You will have to carry out a mission representative of an engineer's or researcher's job by taking an active position within a team. You will be required to be a force of analysis and proposal.

Description of the programme

The 2A internship can take place in a company or in a laboratory, in France or abroad. It lasts between 2 and 3 months (8 weeks minimum) and takes place from June to August.

How knowledge is tested

In addition to the report and the evaluation of the company, the student will have to make a defense in front of a jury composed of your school tutor and another permanent teacher of the ECM. Terms of the defense: 20 minutes of presentation, followed by questions / discussions with the jury.
