

Stage

Presentation

Learning objectives

The main objectives of the internship are:

- * to be capable of carrying out a high-level scientific, technical and methodological study
- * take responsibility for an engineering project
- * create a bridge to the 1st job

Description of the programme

The internship is compulsory and lasts between 4 and 6 months

Generic central skills and knowledge targeted in the discipline

This internship will enable students to:

- * carry out an engineering assignment in its entirety in a professional situation.
- * become part of a team in which they will have to convince others, play an active role and make proposals in order to achieve the objectives
- * reinforce the student's close links with the professional world.
- * develop initiative and autonomy
- * develop the know-how and interpersonal skills essential to their professional future.

How knowledge is tested

Final assessment is based on an internship report, an oral presentation and an assessment by the host organization.
